

Amendments to the Claims

Please amend the claim as follows:

Claim 1. (original) A method for delivering medical assistance to a traveler while visiting in a foreign country, the traveler utilizing a client system, the method comprising the steps of:

- displaying one or more selection buttons on a display of the client system, each selection button being associated with at least one type of medical assistance, the medical assistance being provisioned in at least two different languages and being associated with at least two countries;

- receiving a selection of one of the selection buttons;

- sending a request to a server; and

- the server

- delivering the medical assistance associated with the selected button in the selected language and customized based on the selected country.

Claim 2. (original) The method of claim 1, wherein the step of delivering the medical assistance comprises selecting medical assistance from a group consisting of:

- providing information on medical services in the foreign country,

- translating a prescription to the foreign language,

- translating medical information of the traveler into the foreign language,

- delivering a medical referral in the foreign language,

- providing online medical consulting in a preferred language of the traveler,

and

- providing online drug consultation in a preferred language of the traveler.

Claim 3. (currently amended) The method of claim 1, wherein the at least one type of medical assistance includes providing an over the counter (OTC) prescription available independent on the foreign country requirements.

Claim 4. (original) The method of claim 1, wherein the client system and server system communicate via the Internet and the step of sending the request to the server comprises sending the request over the Internet.

Claim 5. (original) The method of claim 1, further comprising a life saving article, the life saving article identifying emergency medical information that is related to the traveler and a URL for the server, and the step of sending a request to a server further comprises sending the request to the URL identified on the life saving article.

Claim 6. (original) The method of claim 5, wherein the life saving article is selected from a group consisting of a necklace with a notice plate, a plastic card, or key-holder with a medical plate and a sticker.

Claim 7. (original) The method of claim 5, wherein the life saving article comprises an emergency password and the step of sending a request to the server further comprises sending the emergency password.

Claim 8. (original) The method of claim 1, further comprising a medical measurement device that can be attached to the traveler and is operable to take certain medical measurements of the traveler, and the method further comprises the step of taking the certain medical measurements and transferring the certain medical measurements to the server.

Claims 9 - 25 (Withdrawn)

Claim 26. (currently amended) A server for delivering medical assistance to a traveler, the server being accessible by a traveler while ~~that is~~ traveling in a foreign country and ~~that is~~ operating a client device, the server comprising:

a communication module operative to communicate HTML information illustrating a display of one or more selection buttons on a display of a client system, each selection button being associated with at least one type of medical assistance, the medical assistance being provisioned in at least two different languages and being associated with at least two countries;

a communication module operative to receive a selection of one of the selection buttons;

a database access module operative to access at least one of: a medical services and clinics database, a prescription database, a sickness database and a referral database; and

a web-page generating module for delivering the medical assistance associated with the selected button in the selected language and customized based on the selected country.

Claim 27. (Previously presented) The system of claim 26, wherein said server communicates with said client system via the Internet.

Claim 28. (Previously presented) The system of claim 26 additionally comprising a life saving article selected from a group consisting of a necklace with a notice plate, a plastic card, or key-holder with a medical plate and a sticker; and wherein said life saving article comprises a URL for the server for enabling the sending of a request to a server via said URL.

Claim 29. (Previously presented) The system of claim 26 additionally comprising a medical measurement device operative to be attached to said traveler and to take medical measurements of said traveler and to transfer said medical measurements to said server.

Claim 30. (new) A method for delivering medical assistance to a traveler while visiting in a foreign country, the traveler utilizing a client system, the method comprising the steps of:

displaying one or more selection buttons on a display of the client system, each selection button being associated with at least one type of medical assistance, the medical assistance being provisioned in at least two different languages and being associated with at least two countries;

receiving a selection of one of the selection buttons;

sending a request to a server; and

the server

accessing at least one of: a medical services and clinics database, a prescription database, a sickness database and a referral database; and

delivering the medical assistance associated with the selected button in the selected language and customized based on the selected country.
